The Fujian Skystone Technology Co., LTD. was founded at Fuzhou – China, and have been dedicated to the fabrication of diamond tools for stone industries since 1994. Desenvolved successfully the diamond wire as your center product in 2000, subsequently opening your wire machine factory in 2003. Nowadays, SkyStone has wires and machines industries; a search center and desenvolvimento for tools and another for equipments; a technology center to ores projects and a building for searches about cutting technology..

The company has a team over 700 professionals and is considered one of the brands most renowned and consolidated in the mundial market of diamond tools, bringing with it a huge variety of intellectual property rights of their products.

The Skystone own a complete and advanced technique about a lot of diamond tools. They are wire to cut at stone quarry, cut in concrete (clean demolition), multiwires and singlewires cutting machines and machines for diamond wire to extraction and construction. The products performance has been proved in all over the world. Your production is widely export to

Brazil, Iran, Norway, South Africa, Turkey, Russia, Poland and another 30 countrys.

The strong partnership with the most important brasilian stone producers and the big demand in this market allowed the creation of your on house in Brazil. The new uniti offers the same quality, high productivity and technology knowed globally. The nacional fabrication turns the SkyStone diamond tools the most attractive because of the relation cost-benefit offered in the brasilian market.
